SUMMARY

Senior Frontend Engineer with 10+ years of experience building enterprise-scale and customer-facing React and TypeScript applications. Experienced in improving frontend performance, developing reusable component libraries, and delivering modern user interfaces for products serving millions of users. Strong collaborator who enjoys solving complex frontend challenges and building intuitive, high-quality web applications.

Work Authorization: U.S. Permanent Resident

SKILLS

Core Competencies	Frontend & Architecture	Testing & Quality	Cloud & Collaboration
React	Design System	Jest	GitHub Copilot
TypeScript	UI Component Libraries	Vitest	Git
JavaScript (ES6+)	Storybook	React Testing Library	CI/CD
Zustand	Micro-frontend	Playwright	Figma
TanStack Query	Performance Optimization	Accessibility (a11y)	Agile
TailwindCSS	Vite	Performance Testing	GraphQL
HTML5/CSS3	Webpack	ESLint	AWS
Node.js	REST APIs	A/B Testing	

WORK EXPERIENCE

Citigroup

Senior Frontend Engineer

New York, NY · Oct 2023 - Jun 2026

- Accelerated feature delivery by 40% for a team of 20+ engineers by architecting a React + Storybook atomic component library as part of the organization's frontend innovation strategy.
- Enhanced frontend performance by 50% and reduced page load times from 9 to 2 seconds through large-scale React modernization initiatives, standardizing React state architecture, and implementing legacy system migration strategies.
- Reduced client-side complexity by 20% by defining frontend-driven REST API contracts in collaboration with backend engineering teams.
- Reduced production regressions by 15% and boosted engineering reliability by implementing ESLint, Prettier, and Vitest quality gates within CI/CD pipelines.
- Improved platform scalability, maintainability, and long-term stability by 25% by mentoring 10+ frontend engineers through structured code reviews, architecture guidance, and engineering best practices.
- Led frontend architecture strategy across 5+ large React platforms, accelerating feature rollout and enhancing cross-team collaboration.

Warner Bros. Discovery

Senior Frontend Engineer

May 2019 - Oct 2023

- Increased frontend development efficiency by 40% and refined brand consistency by 90% through contributions to a scalable React + TypeScript Storybook design system adopted across 3 major media brands.
- Upgraded deployment efficiency from 30 min to 7 min by re-architecting the platform into isolated micro-frontends using Module Federation and AWS Amplify, increasing the deployment success rate from 22% to nearly 100%.
- Enabled faster and more consistent publishing workflows for 8+ global media brands serving 100M+ users by developing a React + TypeScript CMS platform integrated with DynamoDB.
- Increased user engagement by 25% by modernizing the official 2020 Shark Week websites for Discovery Channel.
- Accelerated onboarding and reduced ramp-up time for junior engineers through mentorship sessions, technical documentation, and knowledge-sharing initiatives.
- Led development initiatives across frontend platform modernization efforts, collaborating with product, design, and backend teams to deliver scalable CMS solutions.

EPAM Systems

Senior Software Engineer

Jan 2018 - May 2019

- Refined frontend maintainability and development scalability by establishing reusable React component patterns, Redux architecture standards, and Jest testing practices across a 6-engineer team.
- Accelerated delivery of scheduling workflows by collaborating cross-functionally with product, design, and backend teams on a React/Node.js flight scheduling platform.
- Increased engineering consistency by 60% and code quality by 50% by establishing frontend architecture standards and scalable development practices.

Software Engineer

Nov 2016 - Jan 2018

- Earned “Extra Mile” recognition by delivering production-ready features for the HomeAway platform using React and unit testing, which improved platform stability.
- Expanded engineering expertise in JavaScript (ES6), Angular 2+, DevOps, and automated testing through an intensive Google-led engineering program, enabling the delivery of robust production-grade solutions.
- Enhanced cross-team collaboration and Agile delivery effectiveness through engineering workshops and Toastmasters participation.

TATA Consultancy Services

Frontend Developer

Apr 2015 - Nov 2016

- Improved page load performance by 20% through CSS refactoring, asset optimization, and responsive frontend enhancements for USAA’s banking platform.
- Enhanced user experience for 10M+ users by building accessible (WCAG AA) and responsive UI components across 3 major browsers.
- Increased cross-browser compatibility and UI consistency through modern JavaScript and HTML5/CSS3 frontend implementation practices.
- Modernized mobile-first banking interfaces with JavaScript and CSS, improving performance, accessibility, and responsiveness for 10M+ users.

Softtek

Web Developer

Jul 2013 - Apr 2015

- Enhanced loading and UI/UX efficiency by 30% by developing a marketing web portal for GE Aviation using JavaScript and streamlining announcement and news publishing.
- Increased visitor engagement by 20% by developing the official GE Rio 2016 Olympics promotional website.
- Earned GE Aviation’s “Delivery Excellence” and “Best Creative & Innovative Solution” awards for improving CMS usability and delivery speed for 50K+ users.

EDUCATION

Universidad Autónoma de Aguascalientes

Aug 2010 - Dec 2014

Bachelor's, Computer Science
